

Earthquake Visualizer — Updated Setup Guide

This build includes country search (auto-zoom + bbox filter) and charts (Recharts).

Steps:

- 1) Unzip project and open in VS Code
- 2) Run: npm install
- 3) Run: npm run dev
- 4) Open the dev server URL (<http://localhost:5173>)

Notes: Uses Nominatim (OpenStreetMap) for country geocoding. No API key required.
